Skills

Backend web development, chatbot deployment, data analysis, industrial programming

Programming languages

Strong knowledge of Python, C ++ and Java, basic knowledge of other programming languages

Foreign languages

English, intermediate

Proficiency in tools

Web frameworks: Django, Flask (+ addons), Spring boot

SQL Query Language
MySQL, PostgreSQL
Experience with various ORMs

Knowledge of python libraries for data analysis:
numpy, pandas, sklearn, matplotlib

Design Patterns, MVC

Git version control system

Primary education

Faculty of CS, HSE (since 2019)
Program: «Applied Mathematics and Computer Science»

HSE Lyceum (2017–2019)
Profile: "Mathematics and Computer Science»

Additional education

«Fintech trends» course, Tinkoff (2020)

School of programmers, **Yandex** (2015–2019)

Debate Chamber, **London** (2019)
Computer Science Summer School

Mobile Development Summer School,
Faculty of CS, HSE (2018)
C#, Unity, AR
Winning the project competition

Experience of participation in specialized competitions

Hackathon RZD (2020), 2nd place
Hackathon «The leaders of the digital transformation» (2020), 1st place
Hackathon OpenSpace (2020), 1st place
AMC Makeathon (2020), 1st place
Hackathon SberCode (2020), 1st place
Hackathon VirusHack (2020), 2nd place
Hackathon SMZHack (2020), 2nd place
Hackathon Hack&Change (2019), 1st place
Hackathon FINOdays (2019), 1st place

Team work experience

Since autumn 2019, I have been a backend developer of the PPnP team, consisting of of 5 specialists. We work on commercial projects, participate in hackathons.
I am responsible for technical implementation of solutions, control of development iterations and application launch.

Project activities

Of the most successful projects, I can mention the «Easy Start» support service for entrepreneurs. For this project, each member of our team received the [Moscow Mayor's Prize](). Subsequently, this project was finalized as part of the online intensive «[MOSBOOTCAMP]()».

In the spring of 2020, our team developed a service to promote self-employed citizens вбелую.рф. For this project, we received [a letter of thanks]() from A.V. Budarin, Deputy Head of the Federal Tax Service. At the moment, the service is in the process of being finalized.

Also in 2018, I individually completed and successfully defended a project on the development of a Learning Management System in the format of a chatbot for the HSE Lyceum.
